

Stride with confidence

Transforming Data into Intelligence

Scalable TRansportation Intelligence Development & Enhancement

With STRIDE, gain the operations visibility you need to maximize truck and driver usage, increase operating efficiencies and delight customers by delivering what's expected, when they expect it. You also can efficiently manage your fleet to meet the demands of rising fuel costs, compliance mandates and increased customer service expectations.

STRIDE helps managing your daily operations easy, hassle-free and, most importantly, efficient. We cover all aspects of logistics management: from dispatch to billing and maintenance to driver's compliance. From mobile computing, bar code, RFID to wireless infrastructure – you can efficiently track and manage your fleet, increase driver productivity by decreasing stop-times, and enhance customer service with real-time shipment visibility.

STRIDE can help you in:

From order entry and dispatch through real-time decision-making tools, from logistics management through settlements, STRIDE acts as the hub of your operation. The solution organizes and integrates all of your company's information to help you operate efficiently and effectively. It is a powerful solution that gives you easy access to numbers-based information, allowing you to operate based on quantifiable facts.

Our logistics management solution will help you manage your inbound and outbound freight, optimizes your loads, optimize routes, consolidate. It is also optimize shipments, handle cross docking, pooled loads, split state weights, stop off charges, fuel surcharges, CPM, CWT, carrier rating and pallet rating with ease. STRIDE increase control, manage your total transportation costs, and boost customer satisfaction ratings, transforming your private fleet logistics operation into a performance driven entity.
