

Today, it is widely accepted that outsourcing of IT services enables an organization to stay competitive and current. Managing complex IT infrastructure and trying to reduce costs, the other significant challenge is to unlock the value and leverage the existing investments made in IT infrastructure. Because of these business compulsions, outsourcing of infrastructure management services is gaining prominence.

Optimization of IT resources is what every organization needs, and at Scalable Systems, we take this on a priority basis to simplify network and systems management by efficiently monitoring and managing performance and availability across your entire IT spectrum. Our infrastructure management service is aligned to the ITIL framework, delivering predictable and measurable benefits to our clients. We offer all the benefits of managed services coupled with reduction in operational cost of IT Infrastructure support, faster issue resolution time and access to top-notch talent on round-the-clock basis.

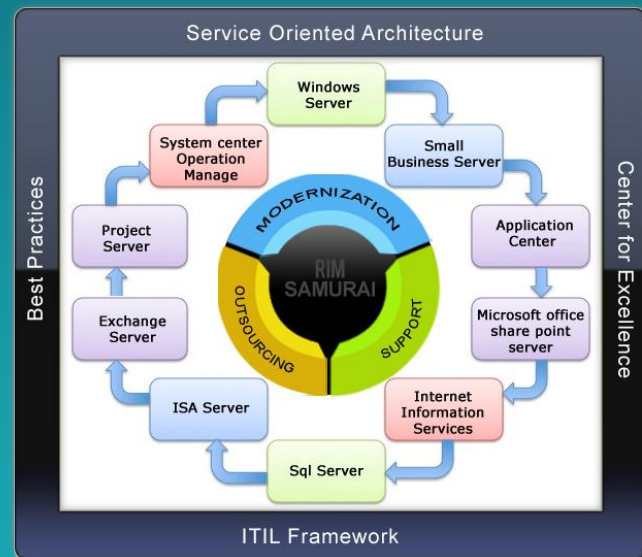

Our Portfolio of Services Includes:

- Windows Server
- Small Business Server
- Application Center
- Microsoft office share point server
- Internet Information Services
- SQL Server
- ISA Server
- Exchange Server
- Project Server
- System Center Operation Manager

Scalable Systems understands how critical your IT infrastructure is to the smooth functioning of your business and we make it our job to ensure that it runs smoothly and efficiently. SAMURAI has demonstrated ability to deliver Infrastructure Management Services to its clients more efficiently and cost effectively.

With the SAMURAI advantage, you can:
