

In today's business environment where 'good' is never 'good enough' and 'change is the only constant', Business Intelligence solution have become a critical catalyst in ensuring sustained growth and a competitive edge. At the same time, ever changing business needs pose a significant challenge to the Business Intelligence implementations. Scalable Systems strongly believes in building Business Intelligence & Reporting systems with agile, scalable, and flexible architecture providing actionable information thus helping you to ensure success of your Business Intelligence initiatives.

Our Offerings

Scalable Decision Support System:

Your organization deals with lots of complex business critical data. These data help your management taking strategic decisions through decision support systems.

Scalable Operational Business Intelligence-

The business value of scalable reporting communicates and helps you understand your company's performance. It leads your organization to extend the boundaries of traditional reporting, giving unprecedented ways to view your business performance.

Its Strategic performance measures monitor the implementation and effectiveness of your organization's strategies, determine the gap between actual and targeted performance and determine your organization effectiveness and operational efficiency.

Features of Scalable Operational Business Intelligence are:

- ✓ Scalable Reporting architecture is an ideal platform for your business trend analysis for analyzing common business patterns and monitor performance on a daily, weekly or monthly basis.
- ✓ A dynamic, intelligence Dashboard will allow the managers to drill-down data to go deeper into the analysis.
- ✓ It eliminates the need to go through several reports, in one shot Dashboard gives a clear picture about how a company is performing in its critical areas.

Scalable Analytics:

With **Scalable Analytics** Service, analytics are easily deployed in your organization in combination with interactive dashboards, providing users with rapid insight into business performance. This also provides detailed scorecards and dashboards containing many analytics, enabling insight and understanding of your businesses condition.

Scalable OLAP cubes are customized and deployed in reporting data store to increase the speed with which your organization can analyze large amounts of data. Scalable Analytics thus is a critical business intelligence tool for the competitive enterprises.

Features of Scalable Analytics are:

- ✓ Multidimensional Metadata (Cube) design
- ✓ Slice-Dice methodology
- ✓ Drill-Down and Drill-Up insight
- ✓ Strategic feedback to show the present status of the organization from many perspectives for decision makers.
- ✓ Diagnostic feedback into various processes to guide improvements on a continuous basis.
- ✓ Trends in performance over time as the metrics are tracked.
- ✓ Feedback around the measurement methods themselves, and which metrics should be tracked.
- ✓ Quantitative inputs to forecasting methods and models for decision support systems
