Scalable Systems is a premier global software consulting, development and IT outsourcing company providing both offshore and onshore software solutions and integration services to business enterprises around the globe. Scalable Systems has proven expertise in encompassing low cost, but high quality and reliable software solutions and services that meets business needs and enhances efficiency to stay ahead of the competition.

With our commitment and focused approach, we deliver a wide range of application outsourcing, consulting and system integration services using well-defined application development process comprising the complete SDLC from Requirement analysis to production support in the following areas.

- ✓ Data Warehousing
- ✓ Business Intelligence
- ✓ Enterprise Resource Planning
- ✓ Application Development
- ✓ Web and e-commerce

Competency

With our expertise in Data Management, Data Warehousing, Data Integration, Business Intelligence, Enterprise Resource Planning and Web/Application development and our ability to translate this expertise into successful development and implementation of our customer needs helps to achieve sustainable competitive advantage, stellar performance and long term success.

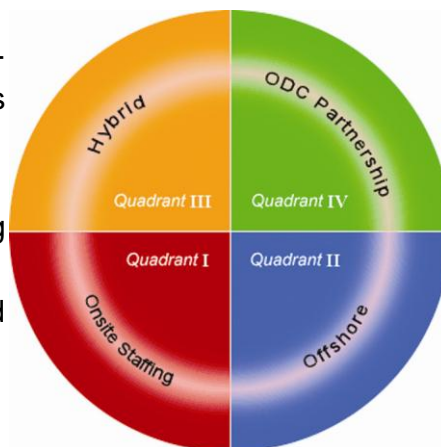

With In-depth technical expertise and significant domain knowledge combined with best practices and an attitude to achieve beyond the perceived level of confidence Scalable Systems consultants and project managers can provide outstanding services in professional services, Educational Services and Project Management.

Offshore development has huge advantages for all those businesses that use an outsourcing model for application development. By drastically reducing your IT investment without compromising the quality and partnering with you to build and scale innovative business solutions Scalable Systems can help you achieve your business targets.

Working in partnership with Scalable Systems will give your organization seamless access to the specialized skills, knowledge and sustainable IT solutions as per your business requirements. This joint approach delivers cost effective innovative IT solutions by creating base for long term business growth and helping companies to focus on the core business.

Scalable Systems outsourcing software development service provides timely delivered and cost-effective solutions with clear focus on high quality. Our experience in providing quality software solutions, project management capabilities and world class standards can give your business the edge.

Why Scalable

At Scalable Systems we understand every client's unique needs and budget. We take every client and assignment with equal seriousness so we can provide software solutions and integration services based on the individual client needs within budget with high quality. We focus on going the extra mile to help our clients achieve a sustainable business competitive advantage. This approach gives our clients the confidence of a partner who is more interested to see their success through the client's success rather than trying to sell a technology or services.

Scalable Systems has built a strong foundation of excellence and process maturity that has allowed us to excel in providing enterprise wide software applications with a committed focus on Data Management/Warehousing & Business Intelligence , ERP and Web/Application Development. Scalable Systems accelerates the development of custom software through modular, configurable and SOA-based solution platforms resulting in quick delivery of reliable custom applications. We are an ISO 9001-2000 compliant organization looking forward to CMMI Level III.
